## SKRUTKOVACIE SYSTÉMY A PRIEMYSELNÉ NÁRADIE

automation components

MTS

Od roku 1996 pomáhame firmám inovovať výrobu pomocou moderných a inteligentných technológií.

Takých, ktoré umožňujú vyrábať technologicky najnáročnejšie produkty. Popritom zefektívňujú výrobné procesy, šetria ľuďom čas a uľahčujú im život.

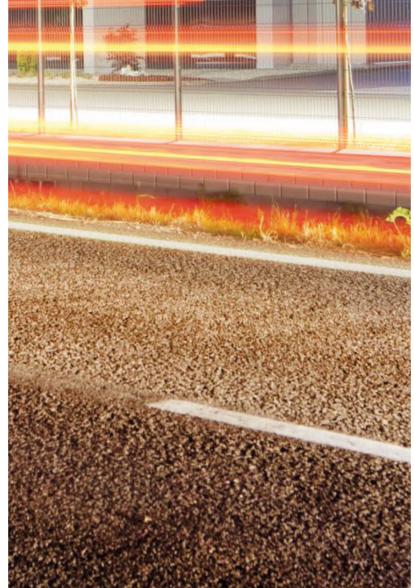

#### Naším cieľom sú kvalitné výrobky, spokojní ľudia a dobré prostredie v priemyselnej výrobe.

Prostriedkom sú naša odbornosť a skúsenosti, férové vzťahy a starostlivo vybrané spoľahlivé technológie.

Chceme ukázať, že je možné úspešne podnikať aj férovo, ľudsky a s pevnými hodnotami. Že spoločnosť z Oravy môže byť kľúčovým partnerom pre veľké firmy z celého sveta.

#### Vybavíme vašu výrobu osvedčenými komponentmi od našich dlhoročných partnerov.

Poradíme vám s ich výberom a aj s tým, ako vybrané komponenty do vašej linky čo najlepšie a cenovo najvýhodnejšie implementovať a využiť na maximum. Vieme sa postarať aj o celú vašu výrobu od A po Z.

Vyrobiť kvalitný výrobok si výžaduje aj jeho kvalitnú montáž. Súčasťou takejto montáže je bežne skrutkovací proces, pri ktorom je potrebné zaskrutkovať skrutku alebo maticu na predpísaný krútiaci moment. No nielen to.

Častokrát je požadované sledovať aj uhol pootočenia skrutky, čas a rýchlosť skrutkovania, či mať možnosť archivovať výsledky, zobraziť skrutkovací priebeh a ďalšie parametre. Dôležité je, aby skrutkovací proces bol nielen presný, ale aj stabilný.

Preto je potrebné použiť skrutkovací systém, ktorý je schopný splniť vyššie uvedené požiadavky.

A jedným z mála takýchto systémov sú elektrické skrutkovacie systémy od firmy Bosch Rexroth, s ktorou v tejto oblasti už dlhodobo spolupracujeme.

Marek Bučka obchodno-technický poradca pre skrutkovacie systémy

#### **SKRUTKOVACIE SYSTÉMY A PRIEMYSELNÉ** NÁRADIE BOSCH REXROTH

Máme všetko, čo potrebujete na ľahké montáže, ale aj na skrutkovanie vo výrobe - od automobilového priemyslu po výrobu spotrebičov. Vyberte si ručné skrutkovacie vretená alebo vretená osadené do manipulátorov a do automatizovaných staníc.

A k tomu poctivé náradie od spoľahlivého výrobcu Bosch, ktoré je konštruované špeciálne na nasadenie v priemyselnej výrobe.

#### Máme pre vás...

- Skrutkovacie vretená pre automatické stanice s rozsahom krútiacich momentov 0,6–1000 Nm.
- Ručné skrutkovacie vretená s rozsahom krútiacich momentov 1–220 Nm a v uhlovom alebo pištoľovom prevedení.
- Priemyselné akumulátorové náradie, ktoré vám pomôže všade tam, kde by prekážal kábel alebo hadice.
- Vysokofrekvenčné náradie s dobrou životnosťou a energetickou nenáročnosťou, ktoré využijete najmä na brúsenie.
- Servisné vzduchové náradie užitočné v remeselníckych dielňach a opravovniach.

#### Keď ide o skrutkovanie alebo priemyselné náradie, spoliehame sa na výrobky Bosch Rexroth.

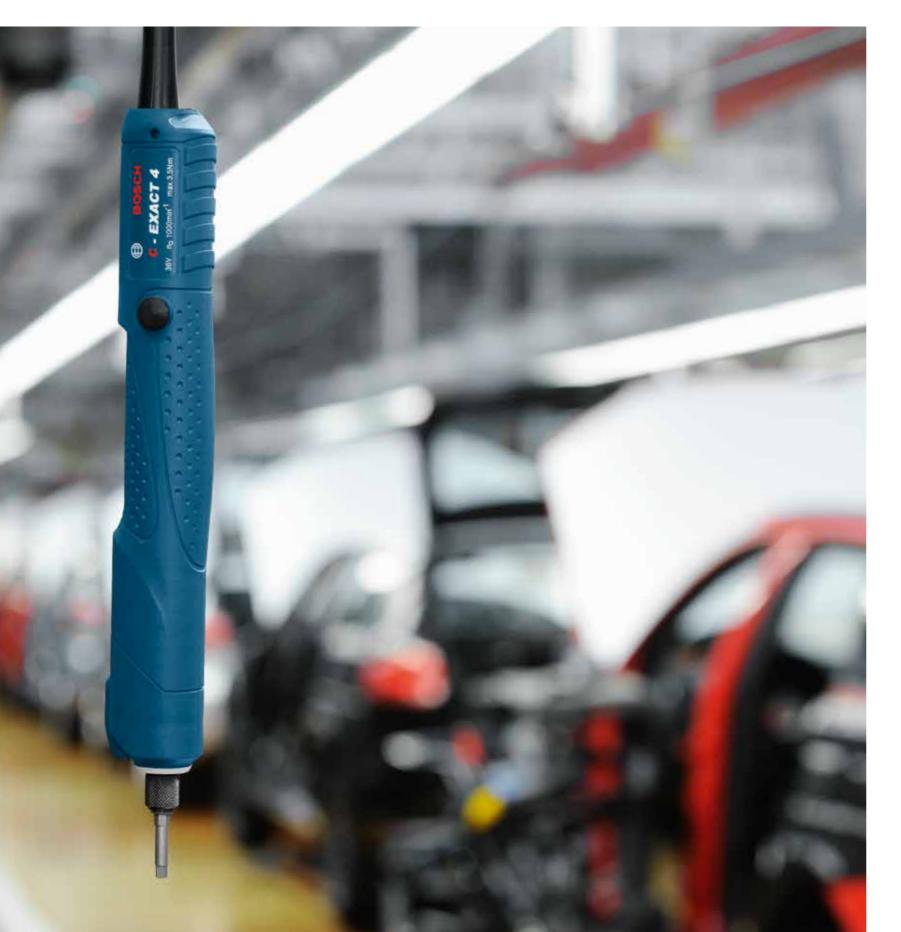

- Ich techniku máme odskúšanú vo vlastnej výrobe. Nekazí sa a dá sa na ňu spoľahnúť.
- So skrutkovacími systémami Rexroth vytvoríte pevné a precízne spoje, ktoré nezlyhajú.
- Náradie vám dobre padne do ruky a ľahko sa s ním pracuje.
- Ručné výrobky sú ľahké, ale znesú aj extrémne zaťaženie.
- Všetky produkty majú tichý chod.

## **C-EXACT** Production screwdrivers

### Hopefully, you will not run out of screws

C-EXACT and PUC-EXACT. The production screwdriver system from Bosch. The new C-EXACT electric screwdrivers offer much more than just a robust housing. High accuracy and repeatability are guaranteed, even after driving 1 million\* screws.

\* according to Bosch endurance tests

### Never lets you down even after 1 million screws

#### Robust, efficient and user-friendly

Low-voltage operation, brushless EC motor technology and key components from the EXACT cordless screwdriver series make the C-EXACT electric screwdrivers cost-effective tools with innovative performance features. When required, the clutch offers 15% more torque in left-hand rotation for loosening screws. The clutch is adjusted using a special tool. If the adjustment tool is stored in a location inaccessible to the user, **Figure 1** ESD (ElectroStatic Discharge) compliant the torque cannot be adjusted unintentionally. Colour marking rings enable quick identification of different screwdrivers in the assembly line.

#### Precise and stable under load

Whether assembling computer drives, electronics or precision mechanical equipment, the C-EXACT is the right choice when precision is what matters most.

Bosch quality testing for the C-EXACT family is extremely rigorous. In endurance testing, the C-EXACT tools must survive 1 million\* cycles without failure before being released for production. During continuous operation, they must maintain an ISO 5393 standard Cmk value greater than 1.67 with a tolerance of ± 10%.

Our production tools are therefore among the most accurate on the planet.

#### **C-EXACT electric screwdrivers**

The C-EXACT screwdrivers are the first in a family of electric straight screwdrivers. They are equipped with a combination of great features and therefore set new standards for accuracy and longevity.

- Brushless EC motor technology
- Right-hand/left-hand rotation change with one hand

#### **PUC-EXACT** power supplies

The C-EXACT electric screwdrivers use the PUC-EXACT power supply unit as a clean, silent energy source for the brushless EC motor.

The power supply unit contributes to a reduction in operating costs by efficiently supplying the tool with low voltage.

The electric screwdrivers in the C-EXACT series (electric screwdrivers with 3.5 Nm or 31 in/lbs of maximum torque) are available as a lever start or push start driver.

The PUC-EXACT power supply safely generates the low-voltage electricity needed for efficient operation.

### **C-EXACT** Electric screwdrivers

- Bosch proves robustness and longevity by means of endurance tests with over one million work cycles
- Bosch SEC motor
  All models feature brushless EC motor technology
- High shut-off accuracy with very low tolerance
- Large torque range
- Visual and audible shut-off signals

### **EXACT ION and ANGLE EXACT ION** Now with lithium-ion technology

## **Better than ever before!** With Bosch Premium lithium-ion technology and Wireless Charging

The handy Bosch cordless shut-off screwdrivers in the EXACT range are now more powerful and efficient than ever before.

Enabling the highest repeatability, they are especially suitable for driving rows of screws and completing assembly applications with maximum performance whilst meeting very high quality demands. Thanks to Bosch lithium-ion battery technology, they deliver maximum power for high torques and speeds. They are also extremely resilient with minimal energy loss, so they additionally reduce your costs with their superior lifetime. Their low weight of only 1.3 kg (EXACT ION) also ensures impressively comfortable working in shift operations.

Now also with:

### **Wireless Charging** Always power ready

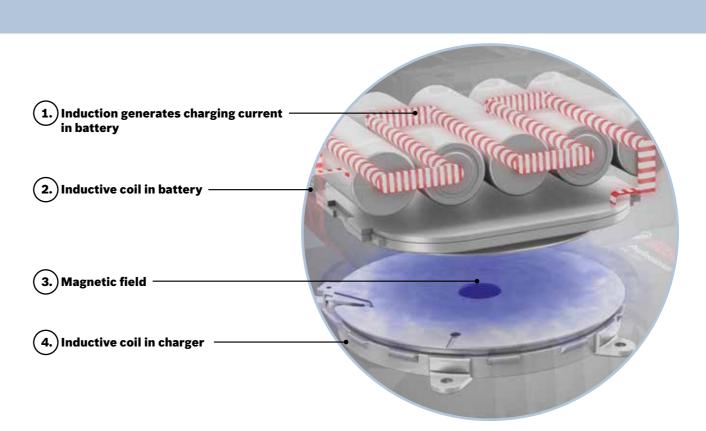

- ▶ Just put the cordless tool down and the battery will charge.
- ▶ Your tool is always ready to use with only one battery.
- You save time and the extra costs for a second battery to alternate with.

LI-ION

₩

COOL PACK

The worldwide unique Bosch Wireless Charging System consists of the charging station and a special battery.

#### Greater user-friendliness and productivity:

- Batteries can stay in the tool
- Charging takes place automatically when the tool is placed on the charger, so it requires no effort
- Flexible mounting frame on the charger allows for a wide range of ergonomic positions – easy to mount at the workplace

#### **Complete flexibility:** Wireless Charging battery GBA (18 V 2.0 Ah MW-B) is compatible with all 18 volt Bosch cordless tools

**Very robust charging station:** -No contact points and durable against water, dust and dirt

\* Battery not included in scope of delivery

### **EXACT ION WK** Now with lithium-ion technology

- Precision shut-off clutch with Cmk > 1.67 (at a tolerance of ±10% in accordance with ISO 5393)
- Multi-stage screwdriving process, adjustable to your individual application via USB interface
- Bosch Premium lithium-ion technology for long lifetime and runtime
- Brushless (EC) motor for 30% more efficiency (compared to conventional DC motors) and extremely long lifetime
- New ergonomic design and lower weight for even more comfortable working
- Higher rotational speeds (compared to SEC-EXACT) and the screwdriving stages reduce production times and improve quality

### **EXACT** Cordless screwdrivers for industry

# **Cordless assembly** with exceptional precision

The EXACT and ANGLE EXACT tools from BOSCH are cordless shut-off screwdrivers for industry – offering the greatest accuracy, longevity and energy efficiency. In assembly situations where cables or pneumatic hoses get in the way, the EXACT series enables you to optimise processes, build better products and reduce your costs.

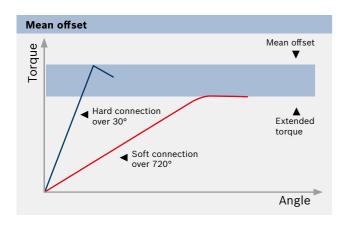

### The Bosch shut-off clutch proven in industry

Our shut-off clutch is designed to minimise user influence on the screwdriving process. Bosch clutches are among the most precise and repeatable in the world. Our repeatability rivals that of some controlled EC tools which cost more than ten times as much as our EXACT cordless tools.

#### Precise and accurate shut-off

The EXACT clutch ensures high torque repeatability and accuracy. Whether in a hard screwdriving application of 30 degrees or a soft screwdriving application of 720 degrees, the clutch guarantees an extremely low mean value offset and consistent torque. Shut-off meets ISO 5393 requirements.

#### **User-friendly features**

The EXACT clutch offers 15% more torque in left-hand rotation for loosening screws. Specified torque is always reached regardless of battery voltage. The electronics prevent the tool from running if the battery falls below a minimum voltage. The clutch is adjusted

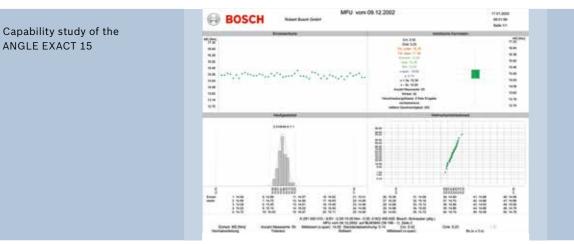

using a special tool. If the adjustment tool is stored in a location inaccessible to the user, the torque cannot be adjusted unintentionally. Colour marking rings enable quick identification of different screwdrivers in the assembly line.

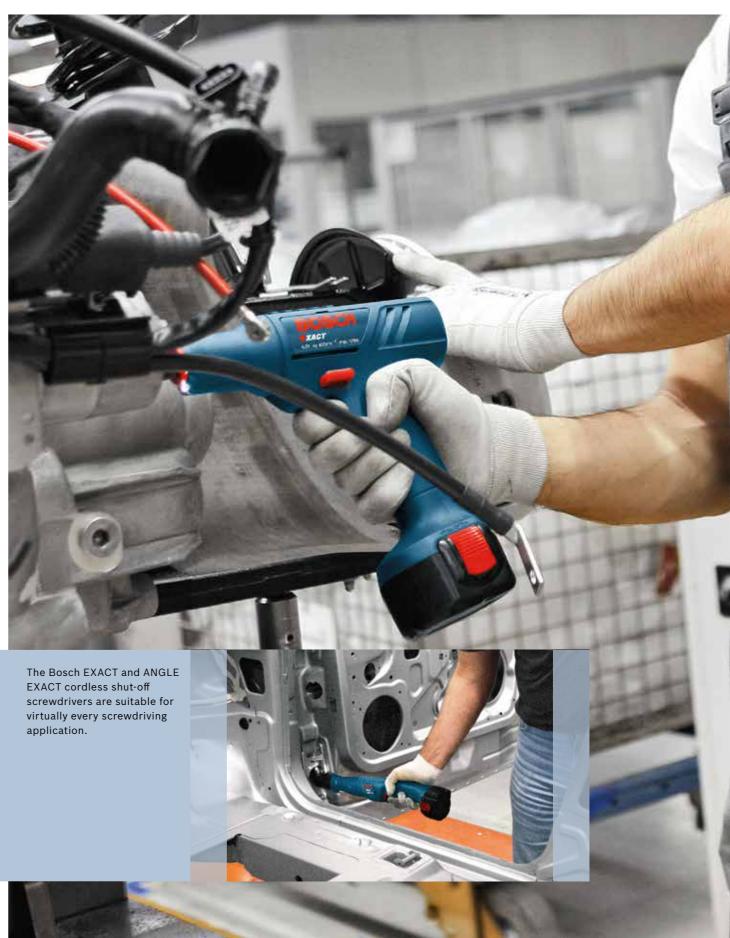

#### Precise and stable under load

Bosch quality testing for the EXACT family is extremely rigorous. The shut-off clutch of the EXACT tools must survive 500,000 cycles\* without failure before being released for production. During continuous operation, they must maintain an ISO 5393 standard Cmk value greater than 1.67 with a tolerance of  $\pm$  10%.

#### A proven module

The shut-off clutch used in the EXACT cordless screwdriver family is the identical clutch used in our line of production air tools. This clutch has been used in many applications over the years and has proven itself a million times over at many of our customers' facilities.

### **EXACT** Cordless centre grip screwdrivers

- Precision shut-off clutch with Cmk > 1.67
- Low weight
- ► Large torque range
- Repeat protection
- Visual and audible signals inform the worker about the battery status
- A visual and audible signal informs the worker about the screwdriving result
- Bright LED light for illuminating the work area
- One-handed operation for right-hand/left-hand rotation change
- Modular design with many common parts
- Colour marking rings for easy identification
- Protective cap for quick-release chuck
- ► Tool holder available
- Suspension hook available

### **ANGLE EXACT** Cordless angle wrenches

- Precision shut-off clutch with Cmk > 1.67
- Low weightLarge torque range
- Repeat protection
- Visual and audible signals for the battery status as
- with centre grip
  Visual and audible signals for the shut-off signal as with centre grip
- Bright LED light for illuminating the work area
- All models with right-hand/ left-hand rotation change function on the switch
- Modular design with many common parts
- Colour marking rings for easy identification
- Protective caps available for angle heads
- Use of the same batteries/ chargers as for models with centre grip
- All models with suspension hook
- Tool weight with angle head and battery is 1.6 kg

The ANGLE EXACT CF models are suitable for tube nut or crowfoot heads due to their speed and torque limitation in left-hand rotation. This special technology prevents damage to the screwdriving head. The screwdriving heads are not manufactured by Bosch.

### 4 **BT-EXACT** Bluetooth cordless screwdrivers

# Who says there are no screws loose here?

The Bluetooth EXACT cordless screwdriver system thinks for itself. The BT-EXACT screwdrivers take their commands from the EXAConnecT controller, which stores the work progress in real time. The system can talk to and take commands from external devices like a PLC, barcode scanner or host network if desired. Improve your assembly process and never forget to drive a screw again.

## **Higher production quality** due to Bluetooth EXACT

#### Quality control with cordless screwdrivers: Higher production quality due to Bluetooth EXACT

The BT-EXACT screwdriver sends radio signals (screw joint OK or not OK) to the EXAConnecT controller, which also sends commands back to the BT-EXACT screwdriver. An EXAConnecT can control seven screwdrivers simultaneously, making the system very costeffective. A class 2 Bluetooth module ensures uncompromising data transfer with a 56-Bit encryption and security mode 3 in accordance with Bluetooth Standard 1.2. Screwdrivers and controllers use proprietary communication only. The software can be configured to prevent Bluetooth from disturbing other wireless systems to ensure interference-free communication. An adjustable antenna power output function allows the system to limit its electromagnetic emissions to virtually zero.

Barcode scanners, PLCs, stack lights and host network systems can be easily connected to the EXAConnecT via the built-in I/O ports, RS 422 interfaces and the network connection. The system can also run as a stand-alone without additional hardware. The screwdriver is prevented from operating outside of the range of the EXAConnecT.

The system is unique compared to other products; it does not require additional software to communicate with a network or computer. All information in the EXAConnecT controller is accessed by using a web browser. All software and firmware is stored within the EXAConnecT controller.

#### The Bosch Bluetooth system: Quality control redefined

The EXAConnecT can control a BT-EXACT screwdriver by workpiece, screw and number of screwdriving applications. The OK/NOK monitoring can be enhanced if desired using runtime and other parameters to accurately determine cross-threading of screws or missing screws, and it can detect the direction of rotation to detect screw removal.

The system can be programmed to count and report only individual screwdriving applications or the entire screwdriving task. Three LED lights on the BT-EXACT screwdriver tell the worker the battery status and show whether the screw was properly tightened and whether the tool is locked, unlocked or out of range of the EXAConnecT. The system collects and reports all this data to ensure that your assembly process always runs perfectly.

### **Seven screwdrivers at a single glance:** Powerful system software

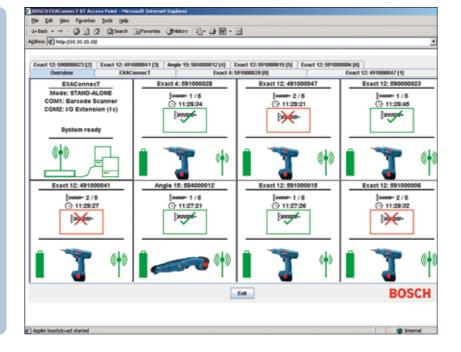

Quality control should be easy, not complicated. Our software combines powerful control, great flexibility and easy-to-use programming to give you the capability to control the BT-EXACT screwdrivers, the EXAConnecT controller and your assembly line from anywhere. The system runs in a web browser without the need for additional user interface software. It is password protected to ensure data security of the system.

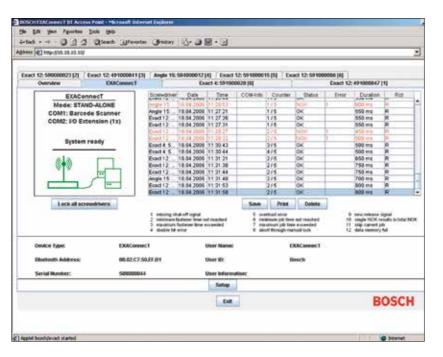

Clicking on the "Overview" tab lets you view and control up to seven BT-EXACT screwdrivers running on one EXAConnecT controller. Each BT-EXACT screwdriver displays antenna signal strength, battery status, work progress and joint condition (OK/NOK shown in green or red).

The serial number and name of each BT-EXACT screwdriver are also displayed. The name of each BT-EXACT screwdriver can be customised for specific applications or locations within the assembly process.

Clicking on the 'EXAConnecT' tab shows the detailed data for up to seven BT-EXACT screwdrivers in real time. The system can display extensive data such as BT-EXACT screwdriver name, date, time of event, screw runtime, direction of rotation, error messages, work progress and additional input data (such as barcode scans or sequence numbers).

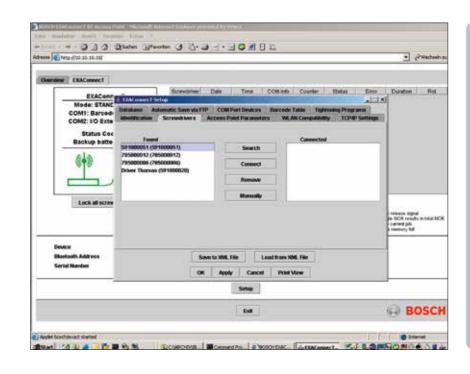

The system also displays the status of the EXAConnecT controller and lists the BT-EXACT screwdrivers that are connected. System error messages are displayed here, along with detailed information about the configuration.

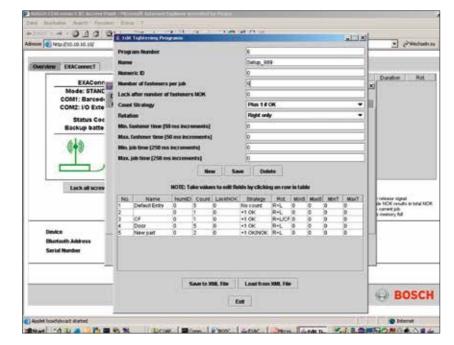

# **Fine tuning for seven precision instruments:** A symphony of data control

Configuration of the system is easy. All functions of the EXAConnecT controller are programmed from only one user-friendly configuration screen. Standard protocols including Profibus, Ethernet TCP/IP, DeviceNet and FTP, serial interfaces, stack lights and RS 422 ports are managed from there. Each individual BT-EXACT screwdriver can be programmed to send data to differ-

ent outputs simultaneously. Each BT-EXACT screwdriver can accept data from a variety of inputs. All this capability is managed by only one setup screen for each BT-EXACT screwdriver.

> The system has separate configuration windows for the EXAConnecT controller and the BT-EXACT screwdrivers. The configuration screen shows part of the EXAConnecT configuration menu. The system can be password protected to prevent unauthorised use.

> Each BT-EXACT screwdriver must be "found" and "connected" by the controller only one time; it will remain "connected" until removed by reprogramming.

Our unique system software can be configured to effectively stop the system from interfering with specific Wi-Fi channels.

The screwdriver configuration menu on the left controls everything from screw count to rework strategy to data output choices. The BT-EXACT screwdriver and the EXAConnecT controller can be configured to send and receive data from a variety of systems, including a host ethernet system, PLC systems, barcode scanners or our digital I/O module.

The system can also monitor screw runtime to accurately determine crossthreading or missing screws.

Rework strategies to evaluate the assembly process can be defined in detail, including customer-specific programming that is created by Bosch.

### **EXAConnecT – the controller** The core of the quality control system

# **Digital I/O module** Expansion module for up to 7 BT-EXACT screwdrivers

The EXAConnecT Bluetooth controller packs a lot of firepower in a small, easy to install package. The enclosure is IP54 (NEMA 12) rated for dust and moisture resistance.

The controller has its own processor, flash memory and operating system, so it can run as a stand-alone unit or connect to a variety of controls. Various status LEDs and a two-digit display that can be seen through the clear cover alert you of connection status or system notifications.

The digital I/O module is used with the EXAConnecT controller. It allows 24-volt signals from up to seven BT-EXACT screwdrivers to be sent to a PLC. The module is IP54 (NEMA 12) rated for dust and moisture resistance.

The EXAConnecT controller forms the link between your process control network and the Bluetoothconnected BT-EXACT cordless screwdriver. Information about the screwdriving process can be exchanged bidirectionally in real time to ensure that each BT-EXACT cordless screwdriver knows exactly what it has to do and when to do it. One EXAConnecT controller can run seven BT-EXACT screwdrivers simultaneously, making it very cost-effective compared to other systems. The EXAConnecT controller can output data from up to seven BT-EXACT screwdrivers via the Ethernet connection (up to four BT-EXACT screwdrivers to a PLC via the 24-volt inputs and outputs). When controlling seven BT-EXACT screwdrivers via a PLC, an additional digital I/O module is required. Refer to page 49 for details.

A wide-range power supply ensures the system works anywhere in the world without the need for additional power transformers. An internal backup memory and real-time clock ensure that critical data is always saved, even in the event of a power loss. The digital I/O module takes its power from the EXAConnecT controller and receives its screwdriving data from the controller's RS 422 interface. The module has 16 inputs and outputs for exchanging data with a PLC. Configuration is done via the EXAConnecT software (in a web browser).

Software requirements:

Operating system: Microsoft Windows XP, Windows 7

Browser: Internet Explorer, Netscape Navigator, Mozilla Firefox

Required plugin (freeware): Java Runtime Environment 1.4.2 or higher

The EXAConnecT controller is capable of supporting up to four BT-EXACT screwdrivers (via a PLC) with limited data transmission. The digital I/O module is needed when 2 to 7 BT-EXACT screwdrivers have to communicate detailed information with a PLC.

The I/O module is not required when using an ethernet connection to a host network. There are different possible PLC configurations for any given situation. Contact your distributor for details.

### **BT-EXACT** Cordless centre grip screwdrivers

- Precision shut-off clutch with Cmk > 1.67
- Low weight
- Large torque range
- Repeat protection
- A visual and audible signal informs the worker about the battery status
- Visual and audible signals inform the worker about the screwdriving result
- Bright LED light for illuminating the work area
- One-handed operation for right-hand/left-hand rotation change
- Modular design with many common parts
- Colour marking rings for easy identification
- Protective cap for quick-release chuck
- ► Tool holder
- Suspension hook available
- All models require the EXAConnecT wireless controller

\* Battery not included in scope of delivery

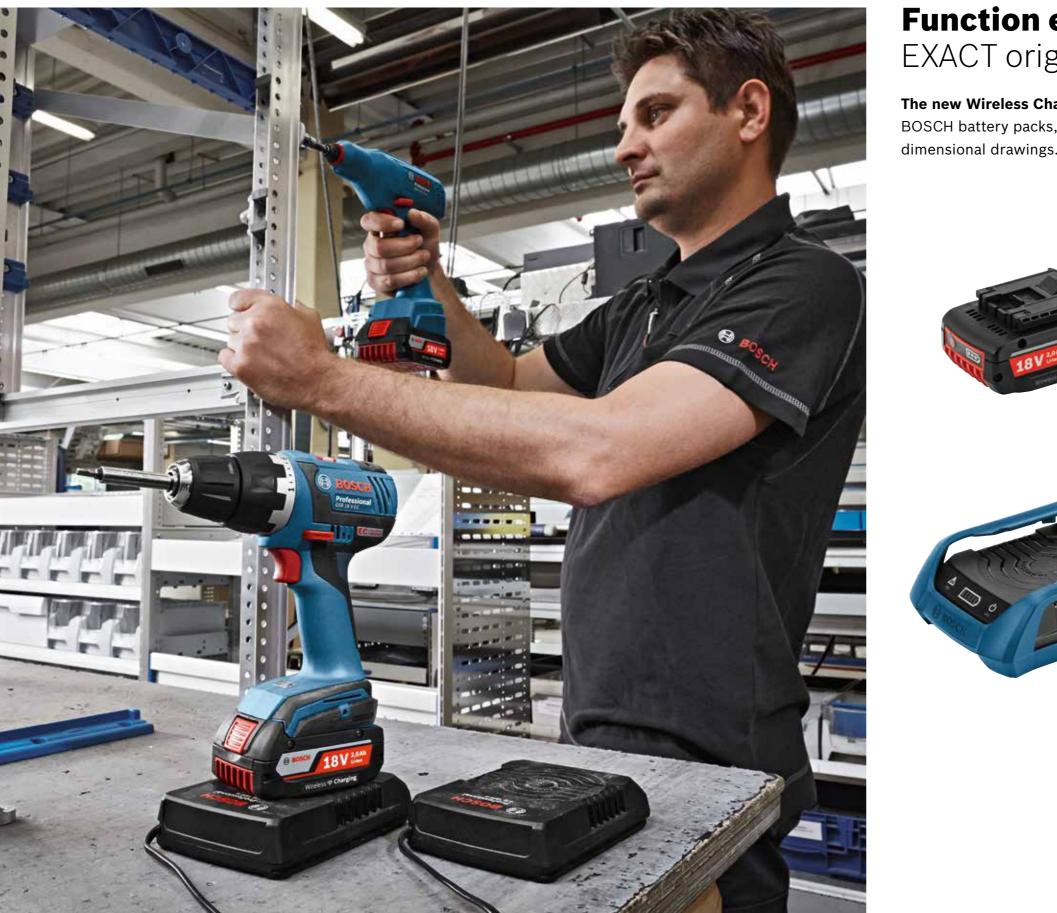

### **BT-ANGLE EXACT** Cordless angle wrenches

- Precision shut-off clutch with Cmk > 1.67
- Low weight
- Large torque range
- Repeat protectionVisual and audible signals
- for the charging state
- Visual and audible signals for the shut-off
- Bright LED light for illuminating the work area
- One-handed operation for right-hand/left-hand rotation change
- Modular design with many common parts
- Colour marking rings for easy identification
- Protective cap available for angle heads
- Angle heads and batteries are not included in scope of delivery
- Use of the same batteries/ chargers as for models with centre grip
- Suspension hook available
- All Bluetooth models require the EXAConnecT wireless controller
- Tool weight with angle head and battery is 1.6 kg (BT-ANGLE EXACT 17, 23, 30: 2.6 kg)

### Accessories EXACT original accessories

### **Function ensured:** EXACT original accessories

The new Wireless Charging System, intelligent battery chargers, original BOSCH battery packs, 4-EXACT power supply unit, general accessories and dimensional drawings.

### **Bosch cordless technology** Maximum efficiency hard-wired

### **Bosch cordless technology** Maximum efficiency hard-wired

Always power ready

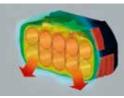

Bosch CoolPack for up to 100% more lifetime

100% compatibility within the 18 volt range

#### **Exceptional runtime and lifetime thanks to Cool**Pack

more lifetime compared to a Bosch battery without **Cool**Pack. Bosch **Cool**Pack ensures balanced warming and reduces heat build-up!

tool and charger

Wireless Charging System

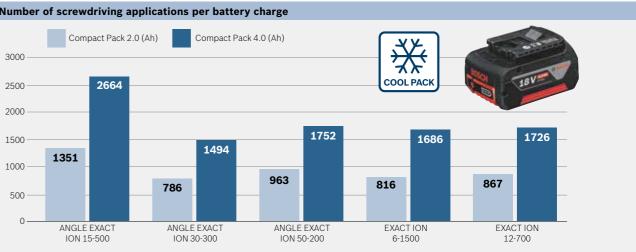

#### **Greater user-friendliness** and productivity:

- ▶ Batteries can stay in the tool
- Charging takes place automatically when the tool is placed on the charger, so it requires no effort
- ► Flexible mounting frame on the charger allows for a wide range of ergonomic positions - easy to mount at the workplace

Charge level indicator by means of three LEDs

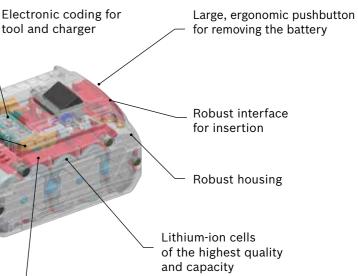

Number of screwdriving applications per battery charge

Built-in

Results of endurance test 02/2013, at maximum torque and a medium-hard screwdriving application at 80° rotation angle, measured from a threshold torque of 50%, at screw size M8

Red **Cool**Pack housing made of heat-conductive material for up to 100%

temperature sensor

### **Battery packs and chargers** for EXACT ION and ANGLE EXACT ION

### **Battery packs and chargers** for EXACT, SEC-EXACT and BT-EXACT
